

PROFESSIONAL SMARTPHONE GUIDING FOR GROUPS

ADVANCED VOICE & MULTIMEDIA COMMUNICATION

A UNIQUE INTERACTIVE TOOL FOR SIMPLE CONNECTIVITY
VIA MOBILE NETWORKS OR VOX PORTABLE WI-FI

INNOVATIVE TECHNOLOGY ALLOWS RELIABLE VOICE AND MULTIMEDIA TRANSFER PLUS SECURE CHANNEL STREAMING

WHAT IS VOX CONNECT?

'Vox Connect' is intelligent smartphone guiding for groups. It is a state-of-the-art app that harnesses wireless technology to connect the smartphones of tour guides and their groups. It is simple to set up and use and delivers crystal-clear communication with low latency. Moreover, by using their personal devices and earphones group members can socially distance with ease.

With Vox Connect, touring becomes even more of a pleasure as advanced mixing technology allows guides to use voice and music to enhance their guests' experience. Guest interactivity enables polls to be conducted or questions answered at any time and a record function allows later playback. Long-distance streaming will allow a tour in Italy to be listened to in New York, or a guest relaxing at their hotel to virtually join their group at the Eiffel Tower.

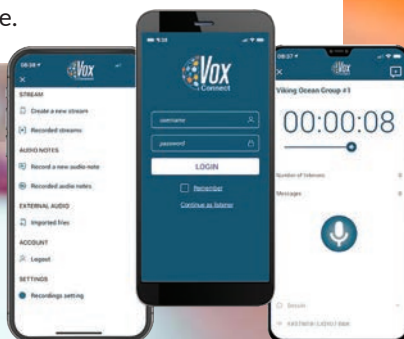

“ Save money and time on operational and equipment costs ”

FEATURES

- Crystal clear communication.
- Low latency reception.
- Reliable connectivity over mobile networks or Wi-Fi.
- Allows voice and music mixing.
- The speaker can conduct polls and Q&As.
- Password function prevents unauthorised access.
- In-app messaging to the speaker.
- Global live streaming capability.
- Portable Wi-Fi available (see last page).
- Spare guest earphones available.

BENEFITS

- Simple to use with minimal set-up.
- Facilitates easy social distancing.
- A future-proofed solution with no capital costs.
- Crystal clear commentary.
- No handing out or collecting equipment.
- No recharging or cleaning of devices.
- Minimal data use or completely free over Wi-Fi.
- Compatible with all Android and iOS devices.
- Record function allows post tour enjoyment.
- Immersive user experience.

HOW IT WORKS

The Vox Connect app is a free download. It turns the smartphone of a guide into a transmitter and the visitor's phone into a receiver, which then connect wirelessly over mobile networks, venue Wi-Fi or Vox Box, our portable Wi-Fi device (see below).

After creating a Vox account you can choose between daily, long and seasonal rental. Simply share your channel code with your guests and begin touring. It couldn't be easier.

20 YEARS OF VOX KNOW-HOW AND EXPERIENCE IS YOUR GUARANTEE OF UNBEATABLE SERVICE AND QUALITY.

VoxBox is portable wi-fi connectivity for Vox Connect
Simple. Powerful. Reliable.

How it works

VoxBox is a compact Wi-Fi control unit used as portable connectivity method for Vox Connect. This sits in a lightweight single shoulder bag and comprises a 10-hour battery, CPU, Wi-Fi router, channel selector and bespoke sound system to allow a guide to connect directly to guest cell phones using Vox Connect.

A great attribute is that VoxBox does not require data connection or internet connection, has failsafe connectivity with low-latency for a large group of concurrent users.

VoxBox has USB charging and can be instantly muted.

Availability

VoxBox will be available for initial demos in summer 2020; then for open use by the end of the year. A SIM card for long distance login and streaming will be available by mid 2021.
